

JIAHAO QIU

Machine Learning Intern, AI Agents Conversational AI Hongkong ID: JR2017298

Shen Zheng | <https://www.linkedin.com/in/danielqiu95/> | <https://github.com/11DanieL11> | danielqiujiyahao@gmail.com

SUMMARY

Computer Science student with hands-on experience building end-to-end machine learning and NLP systems using Python, PyTorch, and TensorFlow. Experienced in data processing, model training, evaluation, and API integration for LLM-powered applications. Passionate about AI agents, conversational AI, and scalable machine learning systems, with a strong interest in deploying intelligent applications on modern AI infrastructure.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript

Deep Learning: PyTorch, TensorFlow, Scikit-learn, Neural Networks, Training Pipelines, Model Evaluation, Hyperparameter Tuning

Machine Learning & AI: NLP, Embeddings, Representation Learning fundamentals, Prompt Engineering, Agent Workflow Concepts

Data & Experimentation: NumPy, Pandas, Data Processing Pipelines, Statistical Modeling, Experiment Tracking

Software Engineering: Git, Linux, Testing, Debugging, REST APIs

Systems & Deployment: Docker, Cloud Deployment fundamentals

PROFESSIONAL EXPERIENCE

Front-End Web Developer

Feb 2021 - Apr 2022

Besthome Wholesale Company Inc.

- Built and maintained company web interfaces for product presentation and client engagement
- Improved usability and front-end functionality through iterative development
- Supported backend data connectivity and content updates

Client Data & Quality Analyst

Dec 2018 - Feb 2020

UNIWAY Computers Ltd. – Sherwoodpark, AB

- Managed structured client datasets for reporting and operational analysis
- Performed data cleaning, validation, and quality assurance workflows
- Supported business decision-making through reporting accuracy improvements

Computer Hardware Service Technician

Feb 2014 - Jun 2018

UNIWAY Computers Ltd. – Sherwoodpark, AB

- Diagnosed and resolved hardware/software issues for desktops and laptops
- Performed system setup, repair, and performance troubleshooting
- Delivered technical support with high customer satisfaction

PROJECTS

Transformer-Based Multi-Label Emotion Classification System

- Fine-tuned a transformer-based language model for multi-label emotion classification on the GoEmotions dataset.
- Built data preprocessing, tokenization, training, validation, and evaluation pipelines for scalable NLP model training.

LLM Financial Assistant

- Built a conversational finance assistant using OpenAI APIs capable of answering natural-language financial queries (<http://www.rssfinai.com/en>).
- Designed API-driven architecture simulating integrations with payment / accounting platforms.

EDUCATION

Bachelor of Science in Computing Science

Sep 2022 – In Progress

GPA: 3.75

Diploma of Automation & Robotics Technician

Jan 2013 - Jan 2014

Graduated with honors, Spring 2014

EXTRACURRICULAR

- **Certifications:** IBM Data Science Certification – IBM / Coursera
